ATTENTION PhD students!!

Are you interested in learning more about **carbonate sedimentology**?

Do you want to visit an island that takes you from water, to sediment formation, to lithified rock?

Then check out the **IAS international summer school** in **Eleuthera, Bahamas** from **May 23-30, 2020**

Areas of study include:

- microbial precipitation
- ooid shoals
- karst features
- aeolianite complexes
- speleothems

**APPLICATIONS DUE: DECEMBER 15, 2019**

to apply, sign into your student member profile on the IAS website, then visit [https://www.sedimentologists.org/me/summer-school](https://www.sedimentologists.org/me/summer-school)

(only visible for student members)

email pswart@rsmas.miami.edu or chelsea.pederson@rub.de with any questions

What you’ll need to apply:

1) motivation letter
2) letter of support from your PhD supervisor
3) proof of PhD studentship
4) updated CV

**expand your horizons**
